

2014 Madison Neighborhood Indicators Data Definitions

Tabulation geography: The Neighborhood Indicators project provides data for neighborhood associations and planning districts within the City of Madison. Because many of the indicators rely on City of Madison data providers, the geographies represented here include only those areas that lie within Madison city limits. Portions of the planning district and neighborhood boundaries that lie outside the City of Madison are not included in the maps nor are they part of the statistical tabulations presented in this report.

Property Foreclosures: Total foreclosure cases in 2013. The data only represent the initial foreclosure filing (i.e. initial legal action) against a property owner and should not be confused with sheriff sales (only a share of these cases go all the way through the legal process to a sheriff sale). Some foreclosure actions against a property owner may actually reflect numerous properties (i.e. in the case of a landlord who owns several rental properties). These duplicate properties will not be found in the dataset. There were 30 Dane County foreclosure cases that could not be reconciled with a physical property location. Overall geocoding match rate for Dane County foreclosures: 96%.
